-

PROJECT

1. RentyClub – Rental Platform

RentyClub is a mobile application that allows users to find and rent properties or items. Users can search, filter, and explore listings based on category and price. The app also includes wishlist and real-time chat features along with Google Maps integration for location tracking.

- **Key Responsibilities:**

- Developed app using React Native
- Implemented search, filter, and wishlist features
- Integrated Firebase and real-time chat
- Used Google Maps API for location tracking

2. Kwik Booking – Automotive Service App

Kwik Booking is a service-based mobile application for booking automotive services like car wash and MOT. It includes Customer, Vendor, and Admin modules for managing bookings and services. Users can schedule appointments and track booking status in real-time.

- **Key Responsibilities:**

- Developed multi-module mobile application
- Implemented booking and scheduling features
- Integrated APIs and managed data flow
- Designed user-friendly UI screens

3. Organics – Online Grocery Retail App

Organics is a grocery delivery app that connects customers with city-based product offerings. It supports Admin and Customer roles where admins manage product charts and customers can place orders. The system handles scheduled deliveries and order management efficiently.

- **Key Responsibilities:**

- Developed product listing and ordering system
- Implemented role-based functionality (Admin/User)
- Managed data using backend integration
- Built clean and responsive UI

4. RoadAlertSystem – Real-Time Incident Reporting

RoadAlertSystem is a real-time incident reporting app for drivers to report accidents, hazards, and traffic issues. The app displays incidents on a map and allows users to update status. It helps improve road safety through live updates.

- **Key Responsibilities:**

- Developed real-time reporting features
- Integrated map-based tracking system
- Handled data updates and user interactions
- Optimized app performance
